Deliverable

Launch Trailer — Hero Cut

DESCRIPTION

Cut the approved script against the studio footage and selected b-roll. Aim for a 90-second assembly — no colour or sound design yet. Flag any gaps where we still need pickups so we can slot them into the Jun 9 shoot.

Great pacing on the open. The middle drags a touch around 0:40 — can we tighten the interview b-roll there?

On it — trimming ~6s and swapping the wide for the close-up. New pass up by EOD.

Client asked to hold the logo sting for the final frame — noting it for the thumbnail stage too.
